ABOUT ME

I build clean, functional web interfaces with a strong focus on usability, performance, and clean code. As a self-taught developer, I turn complex ideas into clear and functional user experiences — always refining my skills and pushing myself to create work that is both practical and meaningful.

PROJECTS

Gemio — Restaurant Reservation Platform

PRODUCTION

Co-founder & Frontend Developer

A full-scale restaurant reservation platform I co-founded, featuring three interfaces — admin dashboard, customer-facing UI, and restaurant owner panel.

Axios

Gemio Admin Dashboard

PRODUCTION

Co-founder & Sole Frontend Builder

Centralized management system giving administrators full control over users, restaurants, reservations, and platform analytics through a clean, data-rich interface.

Word of Faith Church Website

IN PROGRESS

Freelance Frontend Developer

Real-world client project — a modern, accessible, and mobile-friendly website for Word of Faith Church featuring homepage, events, and sermons section.

WHAT I OFFER

- Frontend Development — Responsive, pixel-perfect interfaces using HTML, CSS, JavaScript & React
- API Integration — Connecting frontends to REST APIs using Axios with auth token handling
- UI/UX Prototyping — Visual mockups and interactive prototypes using Figma
- Authentication & Access Control — Secure login flows using Firebase and localStorage
- E-commerce Setup — Functional online stores with product listings and checkout flows
- Frontend Consultation — Reviewing and improving codebases for performance and maintainability
